| TOTAL             | 1096   | 678                        | 368                 | 284              | 24            | 391  | 53      |

In terms of the IPID Act, Act 1 of 2011, Section 29(1) read with Regulation 2(1) of the IPID Regulations, obligates the SAPS and MPS to report specific cases to IPID for investigation. Members of the public are also further able to report such torture allegations to IPID directly in accordance with Regulation 2(4)(a) and (b) of the IPID Regulations.

The above table shows that 1096 incidents were reported since 2014/2015 to 2019/2020 financial years. The total number of 418 cases are still under investigation, while 678 cases are decision ready. Of the 678 cases majority of decision ready was in the financial year 2015/2016 with 138 cases, followed by 2018/2019 with 135 and 108 in 2019/2020. 402 cases were referred to the NPA. NPA declined to prosecute on 284 cases. Prosecution took place on 34 cases. Of the 34 cases where NPA decided to prosecute, the following where outcomes recorded: there were 10 acquittals, 6 guilty verdicts (sentences were ranging from fines to 5 years' imprisonment), 5 withdrawals and 3 mediations. Currently there are 10 cases on the court roll.

A total number of recommendations forwarded to the SAPS/MPS was 391. Of the 391 cases forwarded to the SAPS/MPS outcomes were received on 53 cases. Of the 53 cases there were guilty verdicts on 26 cases. The sanctions that were meted were corrective counselling, written warnings, final written warnings and a dismissal. Furthermore, it was noted that there were acquittals on 17 cases and withdrawals on 10 cases.

**Table 4**: Progress made according the WSKS for 2017 to 2020

The Department of Water and Sanitation (DWS) has formulated norms and standards for water and sanitation and strives to ensure that these indicators are measured to report on progress made for all citizens to attain access to basic services by 2030 in accordance with our NDP in line with the National Sanitation Policy 2016, the National Water and Sanitation Master Plan (2018), etc.

| Population 2017        | Households 2017        | Access to basic water supply 2017 - population | Access to basic water supply 2017 - households          | Access to basic sanitation 2017 - population | Access to basic sanitation 2017 - households       |

During the four-year period of 2017 to 2020 the following growth and access to water services had occurred. See the list below:

- Population grew by 2 990 051
- > Households grew by 1 461 990
- > Population receiving basic water supply grew by 5 823 542 which means that backlogs over the four-year period for access to basic water supply reduced by 2 833 491.
- > Households receiving basic water supply grew by 1 982 149 which means that backlogs over the four-year period for access to basic water supply reduced by 520 159.
- Population receiving basic sanitation grew by 4 158 894 which means that backlogs over the four-year period for access to basic sanitation reduced by 1 168 843.
- > Households receiving basic sanitation grew by 1 570 678 which means that backlogs over the four-year period for access to basic sanitation reduced by 108 688.

Despite great strides that had been achieved in terms of access to education, structural obstacles to the achievement of the right to education still exist. Research has consistently shown that the strongest determinant of educational outcomes in South Africa is socio-economic status. Given the history of South Africa, there is an overlap of poverty, race and historical disadvantage. Although education and economic policies are designed to be pro-poor the negative effect of home background factors cannot be completely eradicated. The pace of social and economic development in the country is therefore a long-term obstacle to full realisation of the right to education.

The number of Grade R learners aged 5 and 6 increased from 87.2 % and 95.9% in 2014 and to 88% and 96.6% in 2018 respectively. Access to Grade R is almost universal. Since 2009, more than 90% of learners in Grade 1 have previously attended Grade R. Near universal school coverage has been achieved, with school attendance by children aged 7 to 15 at about 99%. The implementation of the National School Nutrition Programme is now benefiting over 9 million learners.

According to the Department of Basic Education's 25 Year Review, 99% of 7 to 15-year-olds were attending educational institutions in 2017 (an increase from about 96% in 2002). Among 16- to 18-year-olds, the participation rate decreased to 86%, indicating a reversal in gains made in reaching universal access for learners aged 7 to 15, with some dropping out and others taking longer to reach Grade 12.

While South Africa lags behind other countries in terms of quality of education, recent standardised international assessments show that levels of learning in South African schools have been improving. The challenge is to sustain these improvements and reduce the dropout rate, to ensure higher flows into, and successful completion of further education.

Table 6: Comparative view of the National Senior Certificate pass rate from 2017 to 2020

| Year | National Pass Rate |
|------|--------------------|
| 2017 | 75.1 %             |
| 2018 | 78.2 %             |
| 2019 | 81.3 %             |
| 2020 | 76.2 %             |

The Matric Class of 2019 made history by becoming the first cohort since South Africa became a democracy in 1994 to jump the elusive 80% mark. This impressive national pass rate represented an improvement of 3.1% from 2018, which was 78.2%. The drop in the national pass rate from 81.3 % in 2019 to 76.2 % in 2020 (representing a 5.1 percentage point decrease) should be viewed within the context of the schooling disruption caused by the novel Covid-19 pandemic.

The performance of learners with special needs has also improved. Learners with special needs who obtained Bachelor passes increased from 443 in 2015 to 1 669 in 2018. The number of special needs learners writing Grade 12 exams has increased from 1 691 to 3 591.

Table 7: Comparative view of women in political life from 2004 to 2019

|  | 2004 | 2009 | 2014 | 2019 |
|--|------|------|------|------|
| Women MPs in the National Assembly       | 33%  | 43%  | 40%  | 46%  |
| Women MPs in the NCOP                    | 41%  | 30%  | 28%  | 36%  |
| Women Members of Provincial Legislatures | 30%  | 41%  | 37%  | 46%  |
| Women in Cabinet                         | 42%  | 41%  | 41%  | 50%  |
| Women deputy ministers                   | 60%  | 39%  | 44%  | 46%  |
| Women premiers                           | 44%  | 55%  | 22%  | 22%  |
| Women voters                             | 55%  | 55%  | 56%  | 55%  |

**Table 8**: Racial and gender of the 250 permanent judges

| Race   | African |        | Coloured |        | Indian |        | White  |        | Total: |
|--------|---------|--------|----------|--------|--------|--------|--------|--------|--------|
| Gender | Male    | Female | Male     | Female | Male   | Female | Male   | Female |        |
| TOTAL  | 69      | 46     | 16       | 11     | 13     | 11     | 55     | 29     | 250    |
| %      | 27,60%  | 18,40% | 6,40%    | 4,40%  | 5,20%  | 4,40%  | 22,00% | 11,60% | 100%   |

There is a significant progress in terms of gender transformation over the last two decades in terms of judicial composition. In June 2019 there were 758 female magistrates nationally. This equates to an increase of 166,9% in the number of female magistrates from December 1998 to June 2019. In November 2019, some 207 further appointments were made to the magistracy. The new appointments further strengthen gender transformation as more than half of the new incumbents (105) are female, thus bringing the total number of female magistrates to 863 (out of a total of 1803 magistrates). This means that at the end of 2019, a total of 47,8% of our magistracy were female.

Inequality Trends in South Africa, a multidimensional diagnostic of inequality," Report No. 03-10-19, Statistics South Africa (2019)

According to nearly all the inequality measures presented individuals living in male-headed households seem to be more unequal as compared to those living in female-headed households. Over the years, the Atkinson index shows a similar trend like the Gini coefficient for individuals living in both male- and female-headed households. The Palma ratio corroborates with the Gini coefficient in that there is more inequality among individuals living in male-headed households compared to those living in female-headed households.

Government is implementing various programmes to deal with the scourge of inequality including the combination of pro-poor fiscal expenditure, as well as a progressive tax system to chip away at income inequality that is widely regarded as being amongst the highest in the world. For example, 39% of tax revenue is sourced from Personal Income Tax (PIT), with 61% of taxable income for PIT sourced from the richest 26% of taxpayers.

**Table 10:** SAHRC 2019/20, 2020/21 to 2021/22 MTSF Budget Allocation

| Total Revenue Allocation       | 189 705 000           | 200 132 000   | 211 112 000   |

Government recognises that the budget allocated to the SAHRC may not be sufficient to enable the institution to carry out all its constitutional obligations. However, this allocation should be seen within the context of other competing government needs and the shrinking national fiscus. Budgetary and financial constraints are a reality and thus all bodies and institutions have had to ensure the optimal use of its resources with accompanying cost savings measures having to be adopted by all.

The increase set out above in SAHRC allocation over the 2019/20, 2020/21 and 2021/22 Medium Term Expenditure Framework (MTEF) period shows Government's confidence in the role that the SAHRC has played over the past 26 years of its existence in assisting Government to entrench the culture of human rights, constitutionalism, the rule of law and advancement of our international obligations. Despite its limited resources, the Commission continues producing outstanding research outputs and reports on South Africa's human rights landscape to further deepen our constitutional democracy.

Table 11 Cases registered in the Equality Court during the period under review

The table reflects the statistics relating to equality court matters registered in the Lower Court (Magistrate Court) during April to March 2016 to 2020. Please note that these are registered, not necessarily finalised cases.

| April to March 2016 to 2020 |         |   |  |  |
|-----------------------------|---------|---|--|--|
| 2016/17                     | 2017/18 | 2018/19   | 2019/20  |  |

The DoJ&CD has designed a tool through its National Operation Centre to capture statistics of Equality Court cases when they are registered by the Equality Court clerk. The tool captures detailed information about the complainant and respondent, including information such as race, gender, disability, age, population group and the type of complaint. The tool requires the Clerk of the Equality Court to provide the number of registered, finalised and outstanding cases. Clerks are trained to use this tool and are obliged to periodically submit this information to the national office. Anyone who believes they have been unfairly discriminated against, harassed or subjected to hate speech by either government officials, private individuals or institutions, has recourse to the Equality Court.
