

## ADVANCE QUESTIONS TO UKRAINE – ADD.5

### NORWAY

- How does Ukraine plan to implement the urgent need for juridical reform to avoid further reported instances of selective justice, and to prevent political decisions to be taken to court, instead of being dealt with in political processes and elections?
- Will any concrete steps be taken to reform not only the criminal procedures code, but also the criminal code itself?
- Norway is deeply worried about draft laws depriving LGBT persons of their possibility to assert their rights as sexual minorities. How will Ukraine ensure these minorities their right to free speech and access to the public domain in accordance with its obligations under international human rights law?
- The Crimean Tatars poses a special challenge to reintegration in the Crimea. Ukraine`s efforts to accommodate the repatriated group is much appreciated. However, there seem to be a further need to assess the situation for this group with regard to language, education and the right to land. How could the international community be of assistance in this matter? How does Ukraine assess the suggestion by the OSCE High commissioner on National Minorities to hold an international conference on the situation of the Crimean Tatars?
