UPR Albania

Südwind welcomes that Albania has not rejected any of the recommendations during the first stage of the second Cycle of UPR.

We also welcome that at the end only one recommendation was noted.

Südwind also welcomes the decision of Albania to accept a number of a concerned country asylums' who were in danger in a third country.

However we are concerned about the health situation of some of these asylums specially does who are not living with the other collective of this group.
