

ADVANCE QUESTIONS TO SAINT VINCENT AND THE GRENADINES

(SECOND BATCH)

SPAIN

- Cases of violence against women and children in the domestic sphere continue to be an obstacle and the main barrier in connection to human rights. Is the adoption of new legislative and/or institutional measures planned to curb these behaviours?
- Is there any plan to review the legislation to guarantee safe, legal and effective access to abortion when the life and health of the pregnant woman or girl are in danger, and when carrying the pregnancy to term could cause the woman or the girl pain or considerable suffering? Especially when the pregnancy is the result of rape or incest or when the foetus is not viable.
